## For Discussion Purposes

All CCDPH school metrics are updated on Wednesdays and refer to data from the previous Sunday through Saturday. IDPH metrics are updated on Fridays.

Hover over the bar graphs to view percent change in case counts from week to week. Youth counts/rates represent confirmed cases in individuals under 20 years old.

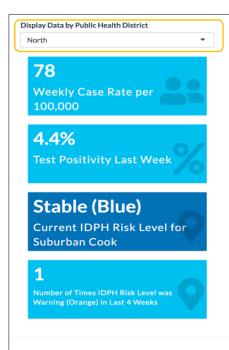

Weekly youth case counts by district between 1 and 4 are not shown to protect patient privacy.

These data are calculated/estimated from publicly available data from IDPH. We do not have direct access to the raw data. These data are provided by the Surgical Outcomes and Quality Improvement Center (SOQIC) at Northwestern Medicine in partnership with our data analytics collaborator, Jeffrey Softcheck MBA, for informational purposes only. Data are updated daily from the IDPH COVID-19 statistics page (https://www.dph.illinois.gov/covid19/covid19-statistics). Data represent total number of tests performed and reported electronically at IDPH, commercial, or hospital laboratories. Data on this website are what has been entered into Illinois' National Electronic Disease Surveillance System (I-NEDSS). IDPH builds in a three-day lag into the data in order to add some cases that are not captured through I-NEDSS (~3% to 5% of the total data) when they publish data at the county-level or region-level on their own website. The data are constantly being entered and may change as cases are investigated. Zip code is the zip code of residence, which may not be the location of the exposure.
